Nila Network

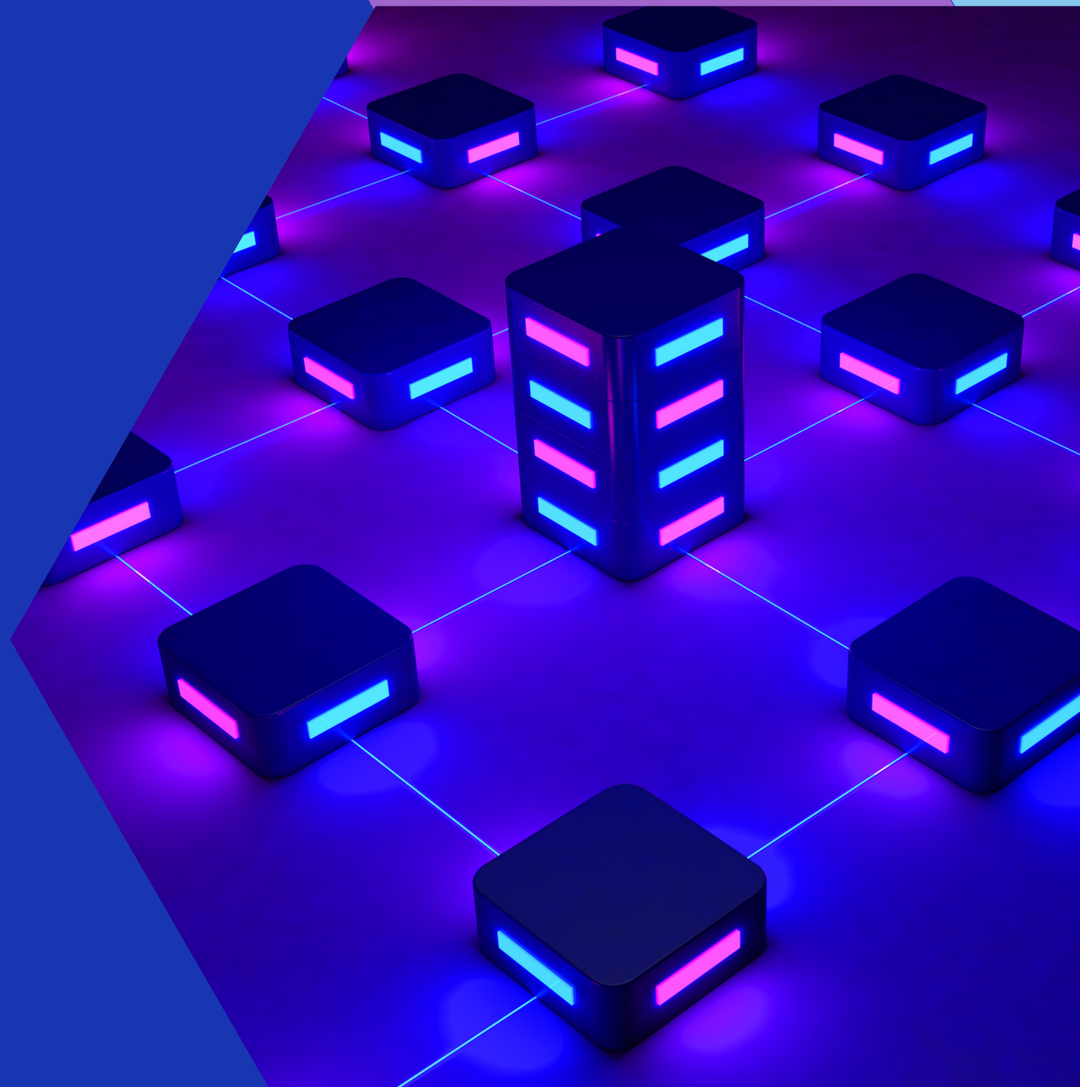
Introduction to Nila Network

Nila Network is a blockchain-based company that aims to provide multiple crypto solutions with both DeFi & CeFi projects. NILA is the native token of the Nila Network.

Nila Network is not just a crypto project, its a startup like Nexo or Crypto.com.



Nila Network Token

'NILA' is the native token of Nila Network.

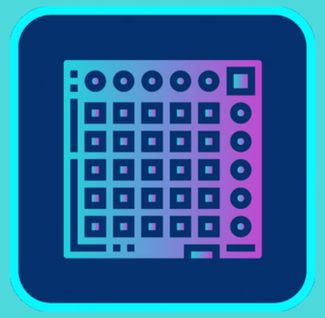
Token Name: Nila Network Symbol: NILA Decimals: 18 Blockchain: BSC

Smart Contract: 0x7e2ece9693f1845142c005ae9d3d2168b3831c6a

Our Solutions & Ecosystem:

NilaSafe

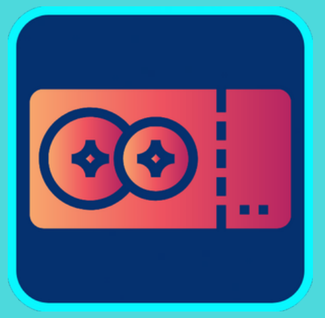
NilaSwap



NilaPad

NilaWallet

NilaCash



NilaRewards

NilaPlay

NilaDigital

NilaPay

NilaFinance

NilaCapital

NilaKart

NilaTools

Coin***a

INO

Bank***e

Raz**e

NilaSafe

Solution: NilaSafe is a fully free & open-source platform which will do KYC of the project team of newly launched tokens and coins on CoinMarketCap, CoinGecko, and other databases to ensure the security of investors' funds and to bring transparency to the projects.

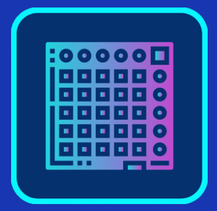
NilaSafe will keep records of the projects team's KYC documents including video verification, facial verification, national identity, and tax documents. If anything goes wrong with the project(scam/rug pull/honeypot/etc) then NilaSafe will hand over the team data to the legal team to take legal action, therefore, they will be caught by the administration and investors' money will be refunded.

We will do partnership with CMC, CoinGecko, other databases and mazor crypto exchanges to do the project team KYC on Nilasafe so everyone can check project transparency on a single place. You will also be able to check directly on CMC.

NilaSwap

Solution: NilaSwap will be the world’s largest cross-chain automatic liquidity adding and locking Decentralized Exchange on multiple blockchains including Binance Smart Chain, Ethereum Mainnet, Polygon Mainnet, Fusion Mainnet, OKExChain Mainnet, KCC Mainnet, Harmony Mainnet, Avalanche Maninet, XDai Mainnet, Huobi Mainnet, Fantom Mainnet, and more.

If you are an early investor of potential crypto projects then you must adopt NilaSwap over UniSwap, PanCakeSwap, or any other DEX. You don’t need to switch between UniSwap or PanCakeSwap over and over anymore to buy newly launched tokens. With the launch of NilaSwap, you will be able to buy any tokens on any blockchain in a single place.



NilaPad

Solution: NilaPad will be the largest decentralized cross-chain IDO platform. NilaPad will empower new potential cryptocurrency projects with the ability to raise funds by distributing tokens to kickstart the project.

NilaPad will be a fully fair decentralized launching pad where one has to hold enough NILA tokens in their wallet to participate in the allocation. But if you do hold the tokens, you are not guaranteed an allocation spot because it is based on a first come first serve basis.

Highlights:

- Multiple blockchains allowed
- Fully Decentralized
- Transparent & potential project only
- Advantages for holding NILA token

NilaWallet

Solution: NilaWallet is a non-custodial decentralized multi-chain wallet. As a crypto enthusiast, you hold several crypto assets in multiple wallets across different blockchains. But with NilaWallet, you will only need one wallet to store and navigate all the ever-growing number of crypto assets on different blockchains.

Highlights:

- Multiple blockchains supported
- Non-Custodial/Fully Decentralized
- Inbuilt Decentralized Exchange
- A single address for all network
- Mobile app/Desktop app/Web extension
- Rewards for holding NILA

NilaCash

Solution: NilaCash will be a fully decentralized protocol for private transactions on Binance Smart Chain & Ethereum. User will be able to transact their BNB, BEP20 tokens, ETHER, and ERC20 tokens anonymously. NilaCash improves transaction privacy by breaking the on-chain link between the depositor and withdrawal addresses. It uses a special smart contract that accepts user's ETH/BNB deposits that can be withdrawn by a new different address. To improve privacy a relayer can be used to withdraw to an address with no pre ETH or BNB balance. Whenever ETH or BNB is withdrawn by the new address, there is no way to link the withdrawal to the deposit, ensuring full privacy.

NilaRewards

Solution: Nila Rewards is blockchain-based market research, survey , task-earn, and customer feedback platform. Companies will conduct customer research, collect customer feedback on the platform and pay Nila Rewards with their preferred currencies. Nila Rewards will pay the users with their preferred crypto currencies including BEP20 & ERC20 tokens.

NilaPlay

Solution: NilaPlay is blockchain-based play to earn gaming platform. Unlike other crypto gaming platform NilaPlay doesn't provide it's own game. Its a gaming aggregator. Users will be able to play various games including RPG, Survivals game like PUBG, COD, FreeFire, and other games on NilaPlay and they will be rewarded with their preferred cryptocurrencies without spending extra funds to play.

NilaDigital

Solution: Nila Digital will be a fully decentralized P2P & B2B NFT marketplace. Everyone will be able to buy/sell NFTs on Nila Digital. People will be able to buy and sell NFTs in bulk to businesses. People will also be able to pay in EMI after the launch of NilaPay.

More on this will be announced on Twitter.

NilaPay

Solution: NilaPay is a crypto payment gateway. People will be able to pay with their preferred cryptocurrencies including ERC20/BEP20 tokens through NilaPay. The main & interesting feature of NilaPay will be the EMI option where people will be able to pay to the merchant by crypto EMI based on their credit profile.

NilaPay Debit card & Credit card will also be available after the public launch of NilaPay.

Nila Finance

Solution: Nila Finance will be the Crunchbase of the crypto industry. Everyone will be able to open accounts on Nila Finance. Anyone can search and contact any investors directly for their project development, publish their project news, get ingubated , build project profile and more on Nila Finance. Project can showcase transparency and professionalism on Nila Finance.

Nila Capital

Solution: Nila Capital is Nila's very own incubation farm. A Venture Capital for potential crypto projects by Nila Network.
More on this will be announced on our Twitter page.

NilaKart

Solution: NilaKart is the first fully crypto-payment powered online shopping platform. Unlike some very few e-Commerce platform where very few cryptocurrencies are accepted by a third party payment provider, NilaKart will directly accept mazor cryptocurrencies including popular ERC20 & BEP20 tokens as one of the payment option.

NilaTools

Solution: Nila Tools will be a patfrom for both developers and non-coders. People will be able to lock liquidity of their tokens, create new tokens on various blockchains, do airdrops, send coins/tokens to multiple addresses at a time, do IDO, generate unlimited numbers of crypto addresses, burn tokens, and many more tools.

Initial Nila Offering

Solution:

INO or Initial Nila Offering will be a revolutionary crowdfunding ecosystem for new projects to get investment.
Potential crypto projects will be listed on Nila Finance to get investment in e-commerce way. Early investors will buy tokens just like buying other stuffs online and will pay with cryptocurrencies/fiat currencies from their wallet. After successfull payment the users will get their purchased tokens/coins instantly in wallet. Project will be able to timelock the buyers too.

Coin***a

Solution:

Coin***a will be an open-source cryptocurrency database like CoinMarketCap, CoinGecko, and other databases which will be fully powered by NilaSafe. For some reason we are keeping the project name secret. We will announce the project name and launch date on Twitter.

Bank***e

Solution:

Bank***e wil be Nila's own centralized exchange for every new tokens/coins. Very new projects will be listed on the platform so everyone can enter the market in early stage. Many people cant use decentralized exchange like PanCakeSwap, UniSwap, NilaSwap for various reason. Bank***e will be very good chance to buy new projects in a very simple way.

We are keeping this project name secret until we confirm the launch date to protect people from scam in Bank***e's name.

Raz**e

Solution: Raz**e wil be Nila's own centralized exchange for mazor coins/tokens. Users will be able to trade mazor coins and tokens with multiple pair in market order and limit order. User will get interest for staking their coins on Raz**e along with Raz**e Credit card.

We are keeping this project name secret until we confirm the launch date to protect people from scam in Raz**e's name.
